Tehran 14174, Iran

November 24, 2017

Dear Prof. Mohammad-Hossein Sarrafzadeh,

I would like to remind you that the application period for 2018-2019 KFAS International Scholar Exchange Fellowship is approaching. I would like to cordially invite you to encourage the esteemed scholars of your university/institute to apply.

It is my honor to remind you that it has already been eighteen years since we began the KFAS International Scholar Exchange Fellowship (ISEF) program to enhance regional academic exchange and cooperation by providing an opportunity to conduct research in Korea. 868 scholars from all around Asia have already participated in our program. The 2017-2018 International Scholar Exchange Fellows who arrived in Korea this past August are working diligently on their proposed research projects. We deeply appreciate your continued interest and cooperation.

The fellows are provided with research expenses for six months or a year in the form of a monthly stipend, initial settlement support, final research paper support, round-trip airfare and accident insurance. We are very interested in welcoming outstanding scholars in the fields of the humanities, social sciences, electronic engineering, computer science, life sciences and energy related fields.

We hope you will encourage scholars from your university/institute to consider this opportunity. It would be highly appreciated if you could notify the faculty members at your institution about this fellowship.

We must receive all application forms by February 23, 2018. We plan to announce the names of the fellowship recipients in late March 2018. Please note that only online applications are valid now, so please refer to the guidelines provided in the attached application prospectus for details.

Thank you for your cooperation.

Sincerely,

In-kook Park
President

Encl. 2018-2019 ISEF Prospectus
